

) EC-70-LSXT+

The new eyevis **EC-70-LSXT+** is a modular rear-projection cube with a screen diagonal of 70" and **SXGA+ resolution (1,400 x 1,050 pixels)**. The EC-70-LSXT+ uses innovative LED technology for illumination. EC-70-LSXT+ is a revolutionary development by eyevis and is completely produced in Germany. It is especially designed for applications which require a reliable 24/7 operation. The display technology is based on the DLP™ technology (Digital Light Processing) by TEXAS INSTRUMENTS. This superior technology produces high-definition images of the highest quality. Whether you want to display video data or more complex graphics – you will always get a pin sharp image.

eyevis attached much importance on the possibility to use their cubes even in critical ambient light conditions or other challenging safety-related problems. The SXGA+ version uses a 1-chip-DLP™ projector with a display resolution of 1,400 x 1,050 pixels. The MTBF of the LED lights lamps is indicated by the manufacturer with >55,000 hours. Thanks to the use of LED light technology, wear parts, such as colour wheels and traditional lamps are no longer necessary. The use of the DLP™ technology guarantees that there is no damage to the display, such as "ghost"-images or burn-in effects, even with continuous static images or fixed patterns.

In numerous tests and comparisons the DLP™ technology turned out to be the most reliable for continuous operation. The lifetime of the DMD™ chips is about 150,000 hours (MTBF: 650 000 hours). Of course, all the other parts of the device share the same high standards. This results in low service and maintenance costs for our customers.

Digital DLP™-Rearprojection Cube

The EC-70-LSXT+ has a screen size of 1400 mm width and 1050 mm height and is available with a standard "seamless" frame (0,3 mm). Furthermore, many optimising options, guarantee stable image quality of all cubes for a long period of time through automatic adjustment of values for brightness, contrast and colour.

Therefore the new eyevis EC-series allows realising completely flexible display walls, providing the highest colour fidelity, a maximum of brilliance and outstanding reliability. Optionally, there is an additional scaler board available with additional input possibilities and further enhancing features.

) ADVANTAGES OF EYEVIS EC CUBES

Outstanding picture quality

- High contrast and best brightness
- Colour uniformity and wide viewing angle
- Latest DLP™ technology
- Best visibility in any lighting condition

Integrated optimising options

- Perfect system adjustment with eyeCube software
- Fast and easy parameter setting
- Many status information available
- Optional Multi-Cube Colour-Brightness Adjustment

Availability and reliability

- Extremely long lifetime of the LED lights
- Qualitative high value components
- Especially designed for continuous operation
- Highly efficient maintenance-free heatpipe cooling

Durability

- Durable and constant picture quality on all Cubes
- Modular, highly available display concept for 24/7 operation
- Low service and maintenance costs
- No wear parts as with traditional lamp systems

Ergonomics

- Very low noise level
- No rainbow effects and other DLP-typical artefacts
- Flexible image quality, adjustable parameters
- Completely dust-proof housing

Precision screen concept

- Perfect viewing angle
- Minimum gaps between cubes thanks to clipping method
- Very easy and fast installation

) EC-70-LSXT+

Digital DLP™-Rearprojection Cube

) ADVANTAGES COMPARED TO STANDARD LAMP/COLOUR WHEEL SYSTEMS

- Shorter turning-on and start-up sequence compared to conventional lamp systems.
- Real flicker-free representation without rainbow effects and therefore a more ergonomic and fatigue-free observation.
- Higher lifetime with low tear and wear effects, no common wear parts like lamps and colour wheels as with traditional systems.
- Much lower colour and brightness drifts over the life-time of the system, compared with traditional lamp systems.
- High light output and higher lifetime through special colour-interleave method.
- Improved representation of moving images.
- Higher attention to detail, through a better colour gamut and colour space depth.

) TECHNICAL SPECIFICATIONS

Type:	EC-70-LSXT+, eyevisCube 70" with LED illumination and native SXGA+ resolution
Description:	Digital 70" DLP™-rear- projection unit, stackable and addible, for data and video representation
Resolution:	1,400 x 1,050 Pixel (SXGA+) / Chip: DMD-Chip SXGA+ / LVDS 0,95"
Processing:	Texas Instruments DDP 3020 (Lifetime DMD-Chip: approx. 150,000 hrs according to TI)
Brightness:	typ. 164 cd/m ² (max. 205 cd/m ²)
Contrast Ratio:	1,500:1
Brightness Uniformity:	≥95%
Image Size (WxH):	1400 x 1050 mm (ca. 70" screen diagonal)
Dimensions (WxHxD):	1400 x 1270 x 750 mm
Weight:	TBD
Input:	1 DVI
Projection Screen:	Seamless CrossPrism Screen, viewing angle horizontal & vertical 180°
Frame:	0.3 mm
Power Consumption:	250 Watt at 110/235 V
Lamp Life-Time:	55,000 hrs (in recommended operating conditions)
Software:	eyevisCubeManager

Environmental:

Operating Conditions:	recommended 15 - 25 °C; 5 - 35 °C; for Seamless Screen 18 - 25 °C; Storing: 0 - 50 °C
Humidity:	0% - 80 % not condensating
Altitude:	0 - 3000 m
Noise Level:	≤36dB

Options:

	<ul style="list-style-type: none">• Scaler Board (internal split controller up to 10x10 Matrix, with 2x DVI, 2x RGB, 2x Video)• Multi-Cube Color-Brightness Adjustment• Network Board• Service and Maintenance Contracts
